Analysis and Conclusion:

This is the fifth PREA Annual Reports prepared by Firetree, Ltd. Results of the data analysis are as follows:

- Total number of allegations as compared to historical data: Increase from total of 3 allegations in 2018 to a total of 7 allegations for 2019. This increase is mitigated to some degree due to two of the allegations still pending final conclusion.
- Staff on resident sexual harassment: Number of allegations in this category increased by a total of 2, from 2018 total, however this is mitigated somewhat by the fact that it was an increase of only 1 in terms of substantiated incident increase.

- Staff on resident sexual misconduct: The number of allegations in this category increased by a total of 1 from the 2018 total. Both 2019 allegations are still pending final conclusion.
- Resident-on-Resident Non-consensual Acts remained at zero incidents for the past four years.
- Resident-on-Resident Abusive Sexual Contact substantiated allegations equaled the 2018 total of 1.
- Resident-on-Resident Sexual Harassment substantiated allegations increased by 2 from the 2018 total.

PREA incident reviews and subsequent supervisory interventions included the increase in surveillance cameras and the strategic placement of the additional camera. Another resulting protocol enacted was the regular review of company vehicle mileage logs. Another initiative resulting from the incident review process was the incorporation of "professional boundaries" into the training curriculum. There were no other significant revisions to policy, training curriculum, or staffing plan. Firetree, Ltd. remains committed to the continual striving for improved sexual abuse and sexual harassment incident outcomes.
