 - 4 of the 6 allegations that occurred in 2022 were for Capitol Pavilion RRC
 - There were no allegations in 2022 for staff on resident sexual misconduct and sexual harassment allegations

- o There were no allegations in 2022 that required corrective plan of actions

Noted during 2022 are 6 allegations of victimizations that occurred at other facilities, that presented during initial and follow-up PRAT assessments. Proper notifications were made to those locations along with the completion of victim services notifications and retaliation monitoring.

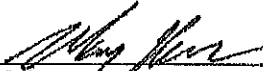

The reduction in the number of totals allegation may in part be attributed to the COVID-19 environment in the previous year. During the COVID-19 environment there were more residents in-house in closer proximity and more frequent interactions between residents and also between residents and staff, therefore presenting more opportunities for incidents and allegations to occur.

2022 was a year with increased emphasis on retaliation monitoring "hand-offs" to receiving transfer facilities.

Firetree, Ltd. continues its commitment in providing safe facility environments, as well as emphasizing the importance of maintaining a proactive and responsive approach to PREA allegations and requirements. This commitment should serve well in improving upon sexual abuse and sexual harassment incident outcomes.
