Analysis and Conclusions:

This is the tenth PREA Annual Report prepared by Firetree, Ltd. This data is being presented relative to facility rather than only in terms of agency-wide outcomes.

- There was one fewer PREA allegation in 2023 than 2022, which shows a continued downward trend across the agency.
- Syracuse Pavilion, again, showed an increased level of PREA allegations but these tapered across the year.
- Capitol Pavilion saw a serious allegation of staff on resident misconduct. While the allegation was not fully substantiated, serious staff boundary issues were identified.
 - O As remediation, a training on resident and staff boundaries was held for all staff at that facility.

Firetree, Ltd. continues its commitment in providing safe facility environments, as well as emphasizing the importance of maintaining a proactive and responsive approach to PREA allegations and requirements. This commitment should serve well in improving upon sexual abuse and sexual harassment incident outcomes.
